## TECHNICAL DATA

MINI GRANULE (FINE)																		
Typical Applications:	Agriculture/Turf/Horticulture/Remediation																	
DESCRIPTION	<b>BLACK EARTH</b> is a naturally occurring material that is very rich in humified organic matter and humic substances. Research has indicated <b>BLACK EARTH</b> can be an effective material to increase plant nutrient uptake and root development while improving soil quality. It will also increase and enhance microbial activity aiding remediation of problem soils.																	
CHARACTERISTICS	<b>BLACK EARTH</b> Mini-Granule (Fine) is a high-humified organic matter material, with high cation exchange capacity (CEC). This product is suited for agricultural applications to increase the water- and nutrient-holding capacity of soils. <b>BLACK EARTH</b> Mini-Granule (Fine) is listed with the Organic Materials Review Institute (OMRI) and verified for use for NOP, IFOAM, JAS, CAAQ, EU 2092/91.
